

# Smart Living outreach

Let us come to you!

Our traveling school can visit yours. We teach Grade 6s and 7s about biodiversity and heritage, water conservation, energy saving and waste minimisation. Pick the topic that fits into your current curriculum and let us help you expand the knowledge of your learners.

Free for schools in under-resourced areas.

COVID safety rules apply.

# COVID-19 and outreach visits

We want to make sure that our visit to your school is a safe one.

- Our outreach teacher will wear a face mask/shield at all times, while at your school and interacting with your learners
- Our outreach teacher will follow the school's COVID-19 screening protocols, when entering the school building
- We have all of our own equipment, which is sanitised between school visits
- We will need a venue for our outreach lesson – please ensure that there is adequate social distancing among your learners for the outreach visit
- Please ensure that all learners keep their face masks on during the outreach lesson, for their safety and that of our teacher
- No hands-on activities will be available at the moment, however our teacher has an exciting and visually engaging presentation for his lesson
